

Surface Area of Right Rectangular Prisms

Surface Area is the sum of the area of all the faces of a 3D object.

Square units (for example: m^2 , cm^2) are used to measure area and surface area and **MUST** be included!

Top/Bottom

$$\begin{aligned}
 A &= L \times W \\
 &= 12\text{cm} \times 8\text{cm} \\
 &= 96\text{cm}^2
 \end{aligned}$$

$\times 2$ faces
(Top/Bottom)

$$192\text{cm}^2$$

L/R

$$\begin{aligned}
 A &= L \times w \\
 &= 10\text{cm} \times 8\text{cm} \\
 &= 80\text{cm}^2
 \end{aligned}$$

$\times 2$ faces (L/R)

$$160\text{cm}^2$$

Front/Back

$$\begin{aligned}
 A &= L \times w \\
 &= 12\text{cm} \times 10\text{cm} \\
 &= 120\text{cm}^2
 \end{aligned}$$

$\times 2$ faces (Fr/Back)

$$240\text{cm}^2$$

$$\begin{aligned}
 \text{Total SA} &= 192\text{cm}^2 + 160\text{cm}^2 + 240\text{cm}^2 \\
 &= 592\text{cm}^2
 \end{aligned}$$

You Try

5 cm, 11 cm, 12 cm

Top/Bottom

11 5

$$A = L \times w$$

$$= 11 \times 5$$

$$= 55 \text{ cm}^2$$

$\times 2$

110 cm²

L/R

11 12

$$A = L \times w$$

$$= 11 \times 12$$

$$= 132 \text{ cm}^2$$

$\times 2$

264 cm²

Front/Back

12 5

$$A = L \times w$$

$$= 12 \times 5$$

$$= 60 \text{ cm}^2$$

$\times 2$

120 cm²

$$\text{Total SA} = 110 \text{ cm}^2 + 264 \text{ cm}^2 + 120 \text{ cm}^2$$

$$= 494 \text{ cm}^2$$

What is the surface area of this prism?

8 cm

3 cm

5 cm

Top/Bottom

$$\begin{aligned}
 A &= L \times w \\
 &= 8 \times 3 \\
 &= 24 \text{ cm}^2 \\
 &\quad \times 2 \\
 \hline
 &48 \text{ cm}^2
 \end{aligned}$$

L/R

$$\begin{aligned}
 A &= L \times w \\
 &= 8 \times 5 \\
 &= 40 \text{ cm}^2 \\
 &\quad \times 2 \\
 \hline
 &80 \text{ cm}^2
 \end{aligned}$$

Fr / Back

$$\begin{aligned}
 A &= L \times w \\
 &= 3 \times 5 \\
 &= 15 \text{ cm}^2 \\
 &\quad \times 2 \\
 \hline
 &30 \text{ cm}^2
 \end{aligned}$$

$$\begin{aligned}
 \text{Total SA} &= 48 \text{ cm}^2 + 80 \text{ cm}^2 + 30 \text{ cm}^2 \\
 &= 158 \text{ cm}^2
 \end{aligned}$$
