

A bright streak of light across the sky is a meteor.

<http://ca.geocities.com/spacephysicsis/>

If the meteor hits the earth before vaporizing it is called a meteorite.

SATELLITES

Are bodies orbiting around a planet

The Moon is earth's natural satellites.

There are man-made or artificial satellites such as the International Space Station.

[What Life Inside The International Space Station is Like \(13 min\)](#)

Reading on how many
