

let's learn about
CLIMATES

Name: **ANSWER KEY**

Complete the crossword puzzle using the clues below:

Across	Down
1. People who study the climate are called CLIMATOLOGISTS .	1. In temperate climates, winters are not very COLD .
2. Arid climates include DESERTS in Africa and Asia.	3. Tropical climates are associated with a lot of RAINFALL .
4. POLAR climates are known for their very cold temperatures.	5. Tropical climates are found close to the EQUATOR .
6. A little further from the equator are the ARID climates.	7. Climate is an area's WEATHER pattern over a long period of time.
8. Southern California has a sunny climate because many days are WARM .	9. Continental climates are found below the ARCTIC Circle.

The difference between weather and climate is time.

Weather is what is happening right now, and climate is what you typically expect the weather in a specific location to be like for this time of year.

Weather is the condition of Earth's atmosphere at a particular time and place.
